

Slushie Machine Quick Start Guide

Slushie Mixture Preparation

- 1) Dilute and mix the flavour syrup concentrate with water in a suitable container.
 - a) Mix 1 part mix to 3 parts water.
- 2) Remove the lid on the slushie machine reservoir.
- 3) Pour the product into the reservoir ensuring you do not exceed the 'Max Level' fill point as indicated on the outside of the reservoir.
 - a) Never pour hot liquids (those exceeding 25°C) into reservoir.
- 4) Replace lid onto top of reservoir.
- 5) Repeat steps 1-4 for the second reservoir.

Starting Granitore

The below steps outline the operation of 1 reservoir. For the second reservoir, simply repeat steps 2 & 3.

- 1) Switch the  to the **On (I)** position. This will power the entire machine.
- 2) Switch the  to the **On (I)** position. This will turn on the mixer for the corresponding reservoir.
- 3) Switch the  to the **On (I)** position. This will turn on the refrigeration system for the corresponding reservoir.

Dispensing Slushie

- 1) To dispense, pull the tap lever away from the machine on the desired reservoir until slushie pours out.

Emptying Reservoirs

The below steps outline the operation of 1 reservoir. For the second reservoir, simply repeat the steps.

- 1) With the machine power still on, switch the  to the **Off (O)** position. This will stop the refrigeration system on the corresponding reservoir.
- 2) Pull the tap lever away from the machine on the reservoir and empty all contents into a suitable container.
